Office Action Summary	Application No. 10/026,658	Applicant(s) LEE ET AL.	
	Examiner Paul Huber	Art Unit 2653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 & 8-11, drawn to an optical recording medium, classified in class 369, subclass 283.
- II. Claims 5-7, drawn to a method of recording and/or reproducing data on an optical recording medium, classified in class 369, subclass 94.
- III. Claims 12-17, drawn to a method of recording and/or reproducing data, classified in class 369, subclass 53.27.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of invention II for using the product of invention I can be practiced with another materially different product, such as a product which does not include a plurality of data recording/reproducing surfaces, each of the plurality of data recording/reproducing surfaces having reflectances, r_1 , r_2 and r_3 , wherein the reflectances satisfy expressions $r_1 > r_2 > r_3$ and $\{(r_1 - r_3)/r_3\} \leq 0.2$.

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of invention III for using the product of invention I can be practiced with another materially different product, such as a product which does not include a plurality of data recording/reproducing surfaces, each of the plurality of data recording/reproducing surfaces having reflectances, r_1 , r_2 and r_3 , wherein the reflectances satisfy expressions $r_1 > r_2 > r_3$ and $\{(r_1 - r_3)/r_3\} \leq 0.2$.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as being utilized in a device which does not include recording data on or reproducing data from a recording/reproducing surface that is farther from a light source than a selected recording/reproducing surface by using light having an intensity that is increased by 4-20% as required in invention II See MPEP § 806.05(d).

Art Unit: 2653

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was not made to the applicants' representative to request an oral election to the above restriction requirement due to the nature of the application, e.g., foreign applicants, and the need for the examiner to promptly act on the application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Huber whose telephone number is 703-308-1549.
